

## KERALA STATE RUTRONIX

### About Air Cargo Management

Cargo handling is performed at thousands of airports all over the world by hundreds of companies, posing a high potential risk for deviations in the quality of handling. IATA actively drives the development of ground handling operations standards, best-practice processes, and procedures. We promote global consistency and harmonization.

IATA works to drive efficiency in all areas of cargo operations. The integration of those efficiencies into processes plays an increasingly critical role in today's air freight industry. In Airmail, we work to guarantee an efficient supply chain for the delivery of e-commerce goods as well as regular mail. On Load Devices (ULD), IATA works to enable their safe, proper, and effective management, use, and control.

The air cargo industry is transforming to capitalize on e-commerce. Building global standards, creating partnerships, and fostering innovation are critical to making the most out of the worldwide expansion of online retail. IATA works to simplify the business and embrace new initiatives and technologies. Our objective is to make air cargo easier, faster, and smarter.

In the cargo facility of the future, humans and machines work in harmony to offer both higher efficiency and superior customer service. Fully automated high-rack warehouses, automated and green vehicles navigating autonomously through the facility, employees equipped with advanced tools, including artificial intelligence and augmented reality. The facility of the future will be safe and secure, green, automated, connected, and smart.

### PROGRAM STRUCTURE & COURSE DETAILS

**COURSE**  
Name

Certified Course in  
**Air Cargo Management**  
(CCACM)

ELIGIBILITY

SSLC

DURATION

3 Months +  
1 Month Internship

COURSE FEE

17,000/-\*  
\*GST Applicable

### SYLLABUS / MODULE DETAILS

- SUB. 1 : FUNDAMENTALS OF LOGISTICS  
SUB. 2 : AIR CARGO MANAGEMENT

#### Methodology

Theory, Internship & Placement assistance, etc...

#### Highlights

- The program focuses on developing a career in Air Cargo Management
- The program has been designed taking into consideration the needs of both working professional as well as fresher.
- Faculty members include experts from the industry and academic
- Contemporary Study Material

#### Certification

**KERALA STATE RUTRONIX**

#### Job/ Carrier Opportunities

- Regional transport market knowledge including equipment, port and airport operations relevant restrictions and regulations
- Coordinates and monitors the safety, technical performance, and cost of the contract
- Develops solutions to program problems, and directs work of managers and other employees
