

## KERALA STATE RUTRONIX

### About Shipping & Freight Forwarding

The globalization is changed the globe completely with its merits and reachability. The whole world turns into a global market. Shipping and freight forwarding procedures has been turned the entire Global supply chain and goods movable activities very simple and timely to make destination and end consumers. Today the cargos and goods which are manufactured anywhere or any corner of this world can reach any places around the world. In fact, Thousands of cargo ships are roaming around the ocean nowadays carrying several types of cargos. Export and import are the procedures which helps to move those type of cargoes around the world.

Companies have to decide on handling their exports or leaving it to the expertise of freight forwarders. If they want to handle exports instead of letting outside agencies do it, then to meet the growth in demand, they must invest in the latest logistics infrastructure, technology, and skilled manpower to handle the associated tasks. They have to weigh the costs and benefits of such a move before taking it forward.

Freight forwarders specialize in getting lower costs without sacrificing on the quality of the job. They help with the logistics of moving goods from point A to point B in the most cost-effective manner.

Freight forwarders are the intermediary between the consignor of goods and the point of distribution, such as the destination port. They arrange the inland transport, port and customs documentation, the shipping on board ocean vessels, and other supplementary activities.

Because of their rapport with government and other service agencies, they are able to get work done smoothly, besides getting favourable rates, schedules, etc.

### PROGRAM STRUCTURE & COURSE DETAILS
